

## **Outstanding Working Bee**

The working bee held on Sunday February 3 was rated an outstanding success by the course manager Grant Parker and Club Captain Ben Birtles. Attended by around 40 people including about 15 women members, resulted in a multitude of jobs being completed.

Club President Peter Murray, thanking all those who attended, said he couldn't recall a more successful day and particularly as it was a very warm day.

One of the significant tasks achieved was the trenching and wiring of watering valves near the 2<sup>nd</sup> tee and 2<sup>nd</sup> and 3<sup>rd</sup> greens to allow for wireless control of watering in these areas. Because the present wiring of these valves has failed, they must be manually controlled presently and this requires a great deal of time.

Other Jobs included, splitting logs of wood for sale, top dressing fairways, work on widening the 5<sup>th</sup> tee, cleaning out all sheds, picking up branches on various parts of the course, work on both new tees, mowing around the new green, cleaning up around the clubrooms and sheds and many other tasks such as weed spraying.

Following the working bee, volunteers were treated to refreshments and lunch.
